RADIO

PNCLBX'90

Happy new decade! As you enter the 90's, you may ask yourself "What radio station can I turn to on the FM band that provides a fresh and creative approach to music and public affairs?" Welcome to KUCI, located on the left side of your dial at 88.9 FM.

As a public service radio station, KUCI aims to fill a gap in the commercial radio market. Along with our neighbors, like KCRW and KSPC, we strive to serve the community with a diverse source of programming that includes jazz, new rock, reggae, classical, public affairs, ethnic issues, news, and sports. This variety may seem overwhelming at first, however our program guide should assist you in making the choices as to what you want to listen to. Another way of discovering our programming is to lock us in and tune us in at different times of the day. You'll be amazed at your discoveries!

KUCI, as UCI's college radio station, strives to reflect the diversity of the campus population. KUCI is student managed and staffed, and as part of the University, provides experience and training for students in radio broadcasting and related fields. KUCI's sound is not that of commercial radio, however we strive to serve you with the diversity and quality that is characteristic of the University of California. So, tune us in at 88.9 FM.

Testing Freedom of Speech

A 24-hour ban on indecency? Safe-harbor? Perhaps you've heard about it in the news or on the radio, but do you really know what it means? Right now, the Federal Communications Commission (FCC) is deliberating on whether or not to enforce a 24-hour ban on indecency, doing away with the "safe harbor" period between midnight and 6 am.

Currently, during the safe harbor hours, radio stations may broadcast material that contains explicit language, ill-suited to the average person, "as measured by contemporary community standards". Broadcasting of such material may be thought of as merely offensive or played for shock value. However, in many cases controversial spoken word or music is aired during this period, not as a means of shocking the audience, but as a means of communicating an idea or exploring a subject. Some affairs simply cannot be conveyed with a sugar coating!

The public has been given until February 20 (yes, the deadline has been extended) to respond to the proposed 24-hour ban on indecency. While this ban will affect radio stations across the dial, public radio stations (on the left side of the dial) will be most affected as they serve as a forum for all sorts of issues.
